ABOUT

- As a passionate and results-driven full-stack developer with a strong foundation in both front-end and back-end technologies,
- I've honed my skills over several years, becoming proficient and adaptable. Now, as a Customer Retention Manager,
- I merge technical proficiency with customer insights, aiming to excel in both realms. Leveraging this blend,
- I deliver exceptional experiences through software and website development, fostering long-term relationships and driving success.

SKILLS

- HTML/CSS
- JavaScript
- React.js/React Native
- Bootstrap
- Node.js
- MongoDB
- SQL
- RESTful APIs
- Customer Relationship Management (CRM)
- Communication and Interpersonal Skills

PROJECT

Productivity App

React App

The data application efficiently organizes employee productivity metrics, providing detailed insights on a granular level by month and day.

This segmentation enables thorough analysis, offering visibility from team leaders to center managers.

By tracking daily performance, leaders can monitor each employee's progress trajectory, identifying areas for improvement and recognizing high performers promptly.

It facilitates data-driven decision-making, fostering workplace excellence and optimizing efficiency.

This professional tool is invaluable for organizations striving for productivity and success.

Contact Book

React App

PContact book apps allow users to store and organize contact information on their mobile devices. They provide features like adding names, phone numbers, email addresses, home addresses, photos, and notes for each contact. Some apps sync contacts across devices and back them up to the cloud. Contact books help keep important contact info organized and easily accessible on a smartphone or tablet.

EDUCATION

Full sack Developer - HackerU, 2024| 535 hours comprehensive education

Completed an intensive 1.5-year full-stack development program, covering

535 hours of comprehensive education in the latest coding languages, frameworks, and development tools.
